

## ***"Silicon Strategies' 60 emerging start-ups"***

On April 6, 2004, editors from Silicon Strategies' online site revealed their list of what they believe are the top 60 emerging start-up companies working on new and innovative technologies and products. The businesses they chose are "involved in the IC, MEMS, fab equipment, packaging and foundry sectors." The choices of start-ups were based on factors including "financial position, investors, markets, and technology."

We are very pleased and honored that Nanonex has been included in Silicon Strategies' list of 60 emerging start-up companies. To view the entire list of companies please visit Silicon Strategies at
