

## **Nanonex Shipped A Versatile Nanoimprint Tool to UCSB**

November 20, 2004

Princeton, New Jersey, November 20, 2004, Nanonex Co., the leading provider in nanoimprint solution, has shipped a NX-2000-AP nanoimprinter to the University of California at Santa Barbara (UCSB) and will be an part of UCSB NNIN (National Nanostructure Infrastructure Network) Facilities.

NX-2000-AP is a unique and versatile nanoimprinter for photo-curable and thermal imprinting with overlay alignment for sample size from small pieces to 4" wafers. Nanonex's Air Cushion Press ensures an excellent uniformity and high yield. Nanonex's Smart-Sample-Holder allows an easy operation for a variety of substrate and mask size and shape.
