## *Nanonex Delivers Advanced Nanoimprint Tool NX-2000 to North Carolina A & T University*

**Princeton NJ, Mar. 10, 2008:** Nanonex Corporation, the inventor and world's leading provider in nanoimprint lithography solutions with the longest history, announces the delivery of a Nanonex NX-2000 to the North Carolina A & T University in Greensboro, North Carolina.

The NX-2000 was purchased for the Department of Industrial and Systems Engineering by Dr. Salil Desai, whose research is in Nano and Bio Manufacturing. Nanonex is proud to support the leading edge research of Dr. Desai and his team at North Carolina A&T University.

“The Nanonex NX-2000 is a perfect match for Dr. Desai due to its versatility and usefulness to multiple researchers.” John Pong, Sales Director Nanonex.

The NX-2000 also incorporates a fully flexible Smart Sample Holder that accommodates any size of substrate or mask up to the maximum capability including arbitrary shaped geometries. Very fast process cycle times are achievable due to the small thermal mass of the design.

### **About Nanonex Corporation**

Nanonex is the inventor of “nanoimprint lithography”, the world's first nanoimprint lithography company, and the world's leading provider of nanoimprint solutions that include equipment, masks, resists and processes. Nanonex's patented and proprietary nanoimprint lithography (NIL) solutions and Air-Cushion Press™ can manufacture 3D nanostructures with sub-5 nm resolution, large-area uniformity, accurate overlay alignment, high throughput, and low cost. Nanonex NIL solutions have been adopted by a broad spectrum of industry applications, such as optical devices, data storage, displays, light emitting diodes, semiconductor ICs, biotech, chemical synthesis, and advanced materials. Nanonex has over 100 customers and an installed base of more than 40 tools world-wide. Visit [www.nanonex.com](http://www.nanonex.com) for additional information.
